

VIOME

You, decoded.

Viome's at-home Health Intelligence™ Test utilizes the latest and most advanced technology available on the market to give you in-depth health insights that generate actionable food and supplement recommendations all in the convenience of an app.

The future of wellness has arrived!

Don't guess. Test!

Health Intelligence™ Test

Take the guesswork out of your diet and supplements with an at-home test that analyzes your unique biology.

If you struggle with any of the following, this test is for you.

Bloating & poor digestion

Skin irritation or rashes

Feelings of anxiety

Trouble losing weight

Trouble sleeping

Low energy & brain fog

Eating the wrong foods for your body can result in inflammation. We often interpret signs of inflammation as “symptoms”.

Because no two people respond to all food the same way, signs of inflammation are different in everyone. This is why understanding what’s going on with your body is key before you can know what’s healthy for your body!

You are **unique**.

Your diet should be, too.

Even two people who share the same genes respond differently to the same food!

Why?

1. Your body's microbiomes

You have 100 trillion microbes all over your body (most in your gut microbiome). Your microbes have their own DNA, which equal 3.3 microbial genes.

2. How your own genes are uniquely expressed

Even though humans share 99.9% of their genes, the way our genes are expressed are completely different. Your nutrition, lifestyle, stress, use of antibiotics & medicine, age, environment, and physical activity all have a big impact on how your genes are expressed!

**Your genes
are not your
destiny.**

DNA

Genes

What can happen.
(Can't change)

VS

RNA

Gene Expression

What is happening.
(Can be altered by your nutrition)

Viome assesses your microbial and human **gene expression** in order to determine:

- ✓ What's going on in your body
- ✓ Why you are experiencing the health symptoms you are experiencing
- & What you can do about it through the right food and supplements for you

What your Health Intelligence™ Test can reveal about you

- 1 Does your body say you're older or younger than your birth certificate?
- 2 Are you having difficulty losing weight despite trying different diets?
- 3 Are you having feelings of anxiety, brain fog, or lack of energy for no reason?
- 4 Do you feel that you get sick with a cold or allergies more often than other people?

(These are just some of the things you'll learn about)

Your gene expression has a powerful effect on how your body's functions work. Viome assesses your body's systems to see how they are working together and how they impact each other, which is key to understanding more about your health and the way you feel!

Biological Age

Good

Assesses how you're aging internally vs chronologically

Immune Health

Not Optimal

Assesses your body's preparedness to fight off bacteria and viruses

Cellular Health

Not Optimal

Assesses cellular function including antioxidant support, anti-aging functions, & energy productions

Gut Health

Good

Assesses inflammation, digestion, food absorption, gut lining health

✓ **Lose weight**

✓ **Improve Digestion**

✓ **Have more energy**

✓ **Clear up skin**

✓ **Age Healthier**

✓ **Sleep Better**

Just ask our customers...

"I had tried everything - supplements, probiotics, so many dietary changes. I've been on Viome's supplements for 3 months and I can't believe my skin!"

Lauren
Viome Customer

"Skin has been clear for months! Still is the best decision I've made regarding my health."

Ally
Viome Customer

"The only way to know what you're doing is to have something that allows you to see the inner workings, or else it's guesswork."

Tom Hopper
Viome Customer

How it works

Step 1

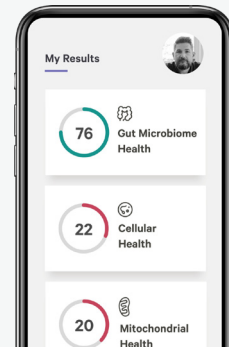

Test at home and send us your samples!

Collection method:
Blood & Stool

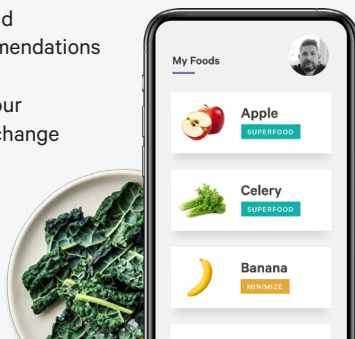

Step 2

See your results right in your app! Learn more about how your diet and lifestyle have had an impact on your response to food and how you feel.

Step 3

Follow your food and supplement recommendations for 4-6 months and feel the benefits. Your recommendations change when you retest.

Precision Supplements™

You have the option to subscribe to one of our plans and get your supplements made-to-order, delivered monthly!

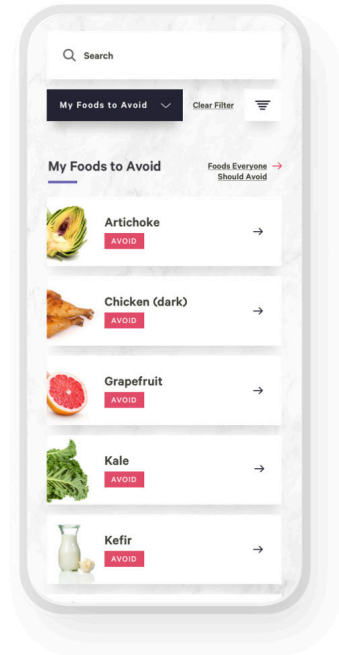

Taking action with Viome's food & supplement recommendations

Food Recommendations

Food Recommendations:

- ✓ Over 400 foods
- ✓ Your unique Superfoods
- ✓ Your unique Avoid & Minimize foods
- ✓ Insights that support your recommendations

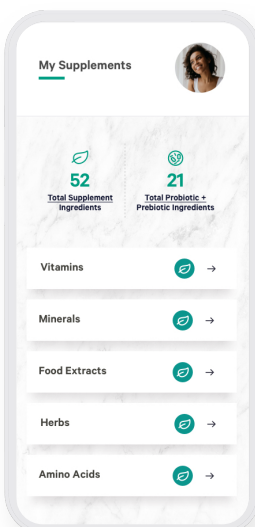

As no two people digest food the same way,
your food and supplements are completely
unique to you and based on your test results!

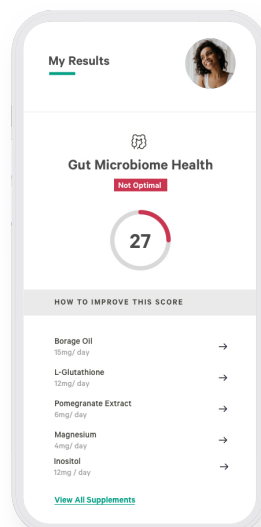

Supplement Recommendations

When it comes to getting the right supplements for your body, what matters most is:

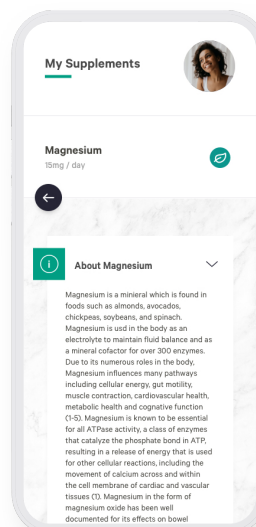

WHAT you need.

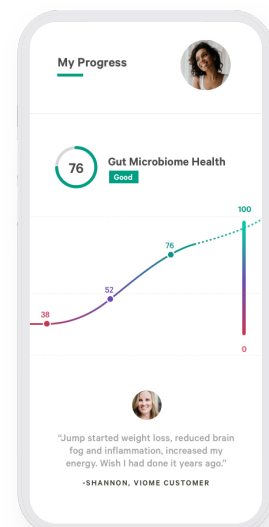

WHY you need it.

HOW MUCH you need.

WHEN you need it.

Introducing

Precision Supplements™

Just what you need, nothing that you don't.

We make it easy to order your Viome recommended supplements in a made-to-order formula with your daily:

✓ Vitamins

✓ Amino Acids

✓ Food extracts

✓ Probiotics

✓ Minerals

✓ Prebiotics

✓ Herbs

This is **YOUR** formula, designed for **YOU**.
No one else.

The perks of our Precision Supplements™

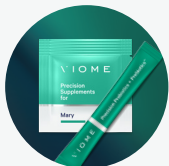

Precision

Your formula is always based on your latest test results. Everything you need, nothing you don't.

Cost

Our average customer's formula contains over 50 key nutrients. Buying off-the-shelf brands for these individually could cost over \$400/month.

Flexibility

Pause or cancel your subscription at any time. We'll update your formula when you retest or as needed.

Quality

We ensure premium ingredients that are non-GMO, allergen-free*, vegetarian, and contain no cheap fillers, magnesiumstearate, dioxides, excipients, or flow agents.

Made in USA

Vegetarian

Non-GMO

Allergen Free

NO FILLERS

•

NO MAGNESIUM STEARATE
(or other stearates)

•

NO DIOXIDES

•

NO FLOW AGENTS

CLIA Compliant

Your microbiome analysis is performed in a US laboratory that is certified to meet CLIA standards. A CLIA certified lab must meet certain quality standards and ensures the accuracy and reliability of your results.

We Protect Your Privacy

To ensure the confidentiality of your data, we separate users' personally identifiable information (PII) from protected health information (PHI) and use multiple layers of encryption and access protection. We do not provide your information or results to employers or health insurance companies or sell your data.
